Field Grown Rootball Trees

We have a special selection of UK field grown trees that are offered at clearance prices. These rootballed stock are available from our tree nursery in Iver now.

The heights reflect actual sizes of the individual trees currently for sale; the availability can change daily, so please call to confirm if particular trees are still in stock.

All prices shown are **excluding** VAT and are on a **collection only** basis.

You are welcome to make an appointment to view the stock, please call 01753 652022.

Cupressocyparis leylandii (Leyland Cypress)

Leylandii is an elegant, columnar conifer with dense foliage. It is tolerant of a wide range of conditions including coastal areas and chalky soils. It can act as a shelterbelt on windy sites and is good at filtering out pollution. Matures to over 25m high

8m high x 1.8m £1250 x 6
5m high £275 x 48

Cupressocyparis leylandii Castlewellan Gold

Leylandii Castlewellan Gold grows in sun or partial shade although its best gold colour is produced in full sun. It is very hardy (-25°C) and wind tolerant, so will grow in exposed sites. Slower growing than its green cousin, it matures to over 15m high

5m high £275 x 18

Field Grown Rootball Trees

Pinus nigra Austriaca (Austrian Black Pine)

Austrian Pine is a hardy evergreen tree that will tolerate a range of tough and exposed conditions; it has double needles and dense foliage. An excellent choice for shelterbelt planting and protection in exposed and coastal areas. Matures to over 20m high

6-7m high x 3-4m £1750 x 12

Prunus laurocerasus rotundifolia (Cherry Laurel)

Prunus laurocerasus rotundifolia or Cherry Laurel will tolerate heavy shade and any soil as long as it's not too chalky.

Rotundifolia is a bushier and more upright growing form of Common Laurel and has an attractive rounded leaf. Matures around 6m high

2.5-3m high x 1m £200 x 20

3-3.5m high x 1m £250 x 5

Quercus ilex (Holm Oak)

Quercus ilex is a large evergreen tree with a densely rounded habit. Holm Oak or Evergreen Oak is a hardy tolerant tree, thriving in all well-drained soils. It is suitable for coastal and urban situations. Matures to over 20m high

3-3.75 high x 1.5m x 1.5m square £475 x 28

2.75-3.25m high feathered £145 x 33

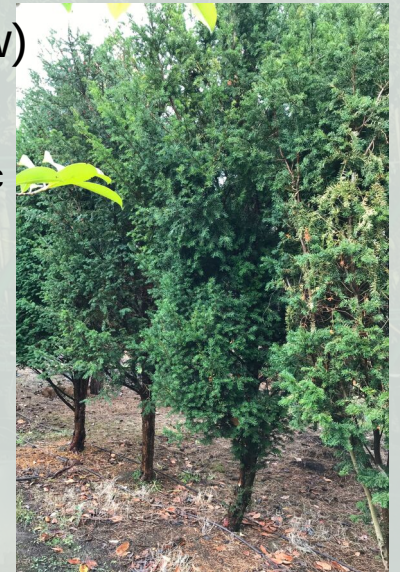

Taxus baccata (English Yew)

English Yew is a classic tree, a long lived evergreen which can grow on either acidic or chalky soils, so long as they are well drained. A very adaptable addition to any garden or landscape project.

Matures up to 12m high

3m high topiary £550 x 10

4m high topiary £950 x 5

Field Grown Rootball Trees

Thuja plicata (Western Red Cedar)

Thuja plicata is a fast-growing large evergreen with horizontal branches forming a loose, columnar tree. Due to its hardiness and dense foliage, this tree is ideal for privacy. Grows well in most conditions. Matures up to 35m high

6m high x 2m £950 x 6
7m high x 2m £1250 x 4

Thuja plicata Atrovirens (Western Red Cedar)

Thuja plicata Atrovirens is an attractive evergreen with red-brown bark and aromatic, rich dark green foliage and a narrow pyramidal, dense crown. Grows best in moist but well-drained soil, but needs protecting from drying winds especially when young. Matures up to 15m high

3.5-4m high x 1m £160 x 25
