FACT SHEET: SCREENING TREES

Ilex castaneifolia (Sweet Chestnut Holly)

Ilex castaneifolia is an unusual Holly variety, similar in its habit and size to Ilex 'Nellie R Stevens' but the leaves are larger, and makes a lovely evergreen tree. It has large and thick green leaves which are marginally spiky at the edges, resembling the foliage of Castanea sativa from which it is named.

Sweet Chestnut Holly is a medium to large tree with a distinctively pyramidal shaped crown. The bright red berries appear in small clusters and are produced in abundance in the autumn following the delicate spring flowers. A great choice for high level screening as it produces a definite and dense screen above the fence line and has the benefit of giving year round interest.

Like many other Hollies, this tree is tolerant of shade and will thrive on most soils, providing they are well drained.

Mature height: 7-12m

Ideal Conditions: Grows well in well-drained soil, is drought tolerant, needs sun-partial sun

GIRTH	HEIGHT	FORM	PRICE <i>from</i>
12-14	350 - 400	Standard	£350.00
14 - 16	350 - 400	Standard	£625.00
16 - 18	400 - 450	Standard	£725.00
18 - 20	400 - 450	Standard	£850.00
20 - 25	300 - 350	Standard	£1,185.00
