## HEDGE FACT SHEET: DECIDUOUS

Practical Instant Hedge™ is a mature ready-grown hedge. Dedicated staff oversee production here at our nursery in Iver, Buckinghamshire. This premium quality hedging product, grown with top quality plants, suitable for both commercial and domestic situations. The deciduous range includes the following species:

Common Name	Latin name	Instant Hedge	Leaf detail
Green Beech	<i>Fagus sylvatica</i>		
<p>This is a popular choice for a hedge, with prominently veined green leaves turn bronze/orange in Autumn and often remain through the winter. It does well on most well drained soils and is particularly happy on chalk.</p>			
Hornbeam	<i>Carpinus betulus</i>		
<p>Similar to Beech, with prominently veined elliptical dark green leaves turn golden-brown in the autumn. The leaves often remain into spring. Thrives in most soils including chalk, clay and damp conditions; happy in either sun or partial shade.</p>			
Hawthorn	<i>Crataegus monogyna</i>		
<p>A popular native plant with dark green deeply lobed leaves; its thorns form an impenetrable barrier. Seasonal interest and good for wildlife. Thrives in most soil and can be planted in all but the deepest shade.</p>			
Purple Beech	<i>Fagus sylvatica</i> 'Purpurea'		
<p>This makes a distinctive hedge, with its green/purple leaves turn red/brown in the autumn and often remain through winter. It is happy on most soils and thrives in chalk.</p>			
Native Mix	A combination of deciduous species		
<p>Our Native Mix currently contains Hazel, Hawthorn, Dogwood, Blackthorn and Alder Buckthorn, all of which are indigenous species to the UK. Native Mix creates a natural look and contains a variety of colours, textures and fruits. Excellent for seasonal interest.</p>
